

Personhood begins at
Conception

The humanness of the unborn child
was known at the time of Roe v
Wade—genetically separate from
the mother, distinctly human,
genome intact

The science of fetology
exploded in the mid 1970s

- Hysteroscopy
- More sensitive ultrasound
- Electronic fetal heart monitoring
- EEG for fetal brain waves
- Radioimmunochemistry

The humanity of the unborn
demonstrated

21 Week baby grasps surgeon's finger

By classic dictionary definition, a
human being and a person are the
same thing

- based on science, technology, and is
the only logical and humane stance

You don't have to be a member of a particular religion to know it's wrong to kill innocent human beings
